

ABSTRACT OF THE INVENTION

The pipe for water pipe and the like includes a pipe body which is used for water pipe, supply-pipe, drainage pipe and the like; and a mixed layer, providing at an inner surface of the pipe body, mixing a mixture including powder of tourmaline ore, granite
5 and the like and charcoal grain powder with effects for far-infrared ray and anion. Therefore, it can improve water quality efficiently and prevent degradation of a pipe, and it can be used in the large flow velocity region without pressure loss of the water pipe line.
